

Premier Academics Sample Game

Team 1 Team 2

1. This American poet, born in 1819, worked as a nurse during the Civil War, an experience that profoundly influenced his poetry. He is referred to as the *Bard of Democracy* for his patriotic spirit. Name this poet known for *Leaves of Grass*.

Answer: Walt Whitman

2. This term refers to the outer courtyard of a castle, typically enclosed by a protective wall. It was often used for various domestic activities and might contain workshops, stables, and other facilities. It is the lower, open area surrounding the central keep. What is the name of this defensive courtyard?

Answer: Bailey

3. These large, multinucleated cells are responsible for breaking down bone tissue by dissolving its mineral matrix and collagen. Essential for bone remodeling and calcium homeostasis, they work in balance with osteoblasts to maintain skeletal health. What are these bone-resorbing cells called?

Answer: Osteoclasts

4. This general was a pioneer in military aviation and served as the Commanding General of the U.S. Army Air Forces during World War II. Who is this general that was later named the only five-star general in the history of the U.S. Air Force?

Answer: Henry H. "Hap" Arnold

Team 1:_____ Team 2:_____

5. This phenomenon occurs when a magnetic field is applied perpendicular to an electric current in a conductor or semiconductor, causing a voltage to develop across the material. Uses of this effect include the creation of different sensors and to determine carrier charge density. What is this effect called?

Answer: Hall Effect

6. This sitcom ran for three seasons on ABC from 1981 to 1983. What is this show, created by Stephen J. Cannell, about a teacher played by William Katt that becomes a superhero when aliens bestow upon him a red and black suit which gives him powers?

Answer: *The Greatest American Hero*

7. Written by a Florentine thinker, this 16th-century political treatise discusses historical examples of governance and military organization. It analyzes the structure and success of the Roman Republic as described in the writings of the historian Livy. What is this work called?

Answer: *Discourses on Livy*

8. **Math Computation:** How much simple interest is earned on \$500 at 7% interest for 3 years?

Answer: \$105

Team 1:_____ Team 2:_____

9. This event occurred on January 30, 1972, in the city of Derry, Northern Ireland, during a peaceful civil rights march. British soldiers opened fire on the unarmed protesters, killing 14 people. What is this incident, which intensified the Northern Ireland conflict known as "The Troubles" and led to widespread outrage?

Answer: Bloody Sunday (Bogside Massacre)

10. **Math Computation:** Simplify: $\log(64)1024$ [Read: log base 64 of 1024].

Answer: 5 / 3

11. This 1897 Gothic novel follows a young solicitor, Jonathan Harker, who travels to Transylvania and becomes entangled with a mysterious count. The story, told through letters and journal entries, chronicles the count's move to England and his clashes with a vampire hunter. What is this classic work by Bram Stoker?

Answer: *Dracula*

12. This spice blend, commonly used in Indian cuisine, includes a mixture of ground spices such as coriander, cumin, turmeric, and ginger. It is often used to flavor dishes like curries and can vary greatly in heat and complexity. What is this essential Indian spice mix known as?

Answer: Curry Powder

13. These hypothetical particles are a topic of speculation in theoretical physics and science fiction. Though their existence has not been observed, they are theorized to travel faster than the speed of light, potentially violating Einstein's theory of relativity. What are these particles called?

Answer: Tachyons

14. This geographic feature, located in the northwestern corner of Oklahoma, is the highest point in the state, reaching an elevation of 4,973 feet. What is this area that is part of an expansive mesa that extends into Colorado and New Mexico?

Answer: Black Mesa Plateau

15. This collection of whimsical origin tales was written by a British author known for his imaginative storytelling. The stories, originally for his children, explain how animals gained their distinctive features, such as the elephant's trunk. What is this 1902 work by Rudyard Kipling?

Answer: *Just So Stories*

16. This psychological model outlines five broad traits used to describe human personality: openness, conscientiousness, extraversion, agreeableness, and neuroticism. Widely used in research and assessment, it provides a framework for understanding individual differences. What is this personality model called?

Answer: Five-Factor Model (or Big Five Model)

Team 1:_____ Team 2:_____

17. This nickname was given to April 2nd, 2025, after Donald Trump announced sweeping new tariffs under the International Emergency Economic Powers Act. The plan included a 10% baseline tariff, 25% on foreign cars, and reciprocal rates against major trade partners. What nickname was used for that day?

Answer: Liberation Day

18. **Science Computation:** Balance the following chemical equation:

$\text{Fe} + \text{O}_2 \rightarrow \text{Fe}_2\text{O}_3$ [read as: Fe plus O 2 yields Fe 2 O 3].

Answer: $4\text{Fe} + 3\text{O}_2 \rightarrow 2\text{Fe}_2\text{O}_3$

[read as: 4 Fe plus 3 O 2 yields 2 Fe 2 O 3].

19. This figure is known as the "Father of Oklahoma" for his efforts in leading the Boomer Movement and organized several expeditions to settle the Unassigned Lands in Indian Territory despite repeated arrests. Who is this man whose efforts eventually contributed to the opening of these lands to settlers?

Answer: David L. Payne

20. **Math Computation:** Find the limit as x approaches infinity of the expression $(2x^3 - 5x + 7)/(3x^3 + 4x^2 + 5)$

[Read: The quantity two x cubed, minus five x, plus seven, end quantity over the quantity three x cubed, plus four x squared, plus five, end quantity]

Answer: 2 / 3

Team 1:_____ Team 2:_____

Sports Trivia: Current & Former PGA Golfers by Nickname

Directions: Given the nickname of a PGA golfer, name the golfer.

- | | | |
|-----|------------------|-----------------------------|
| 1. | Leftie | Phil Mickelson |
| 2. | The Golden Child | Jordan Spieth |
| 3. | Rahmbo | Jon Rahm |
| 4. | Mr. Inevitable | Scottie Scheffler |
| 5. | The Scientist | Bryson DeChambeau |
| 6. | The Golden Bear | Jack Nicklaus |
| 7. | Cupcake | Brooks Koepka |
| 8. | The Shark | Greg Norman |
| 9. | Bubba | Gerry (Bubba) <u>Watson</u> |
| 10. | The Black Knight | Gary Player |

Extras:

- | | | |
|-----|--------------|--------------|
| 11. | The Big Easy | Ernie Els |
| 12. | Rors | Rory McIlroy |

Team 1:_____ Team 2:_____

Fine Arts: Romantic Composers and Their Works

Directions: Given the title of a famous work by a Romantic composer, name the composer.

- | | | |
|-----|---|--------------------------|
| 1. | <i>Academic Festival Overture</i> | Johannes Brahms |
| 2. | <i>1812 Overture</i> | Pyotr Ilyich Tchaikovsky |
| 3. | <i>Ride of the Valkries</i> | Richard Wagner |
| 4. | <i>Fantaisie-Impromptu</i> | Frédéric Chopin |
| 5. | <i>Symphony No. 8 (The Unfinished Symphony)</i> | Franz Schubert |
| 6. | <i>Carnaval</i> | Robert Schumann |
| 7. | <i>Italian Symphony (Symphony No. 4)</i> | Felix Mendelssohn |
| 8. | <i>La Damnation de Faust</i> | Hector Berlioz |
| 9. | <i>La Campanella</i> | Franz Liszt |
| 10. | <i>Alzira</i> | Giuseppe Verdi |

Extras:

- | | | |
|-----|----------------------------------|----------------|
| 11. | <i>Cello Concerto in B minor</i> | Antonín Dvořák |
| 12. | <i>Piano Concerto in A minor</i> | Edvard Grieg |

Team 1:_____ Team 2:_____

Team 1:_____ Team 2:_____

American Civil War - Battles and Leaders

Directions: Given the year, battle, and side, name the army commander.

- | | | |
|-----|-------------------------------------|----------------------------|
| 1. | 1862; 2nd Manassas; Union | John Pope |
| 2. | 1864; New Hope Church; Union | William T. Sherman |
| 3. | 1862; Malvern Hill; Confederate | Robert E. Lee |
| 4. | 1863; Chickamauga; Confederate | Braxton Bragg |
| 5. | 1864; Franklin; Union | George Thomas |
| 6. | 1862; Kernstown; Confederate | Thomas "Stonewall" Jackson |
| 7. | 1865; Five Forks; Union | Phillip H. Sheridan |
| 8. | 1862; Mechanicsville; Union | George B. McClellan |
| 9. | 1863; Champion Hill; Confederate | John Pemberton |
| 10. | 1864; Peach Tree Creek; Confederate | John B. Hood |

Extras:

- | | | |
|-----|------------------------------|------------------------|
| 11. | 1862; Shiloh; Confederate | Albert Sidney Johnston |
| 12. | 1862; Pea Ridge; Confederate | Earl Van Dorn |

Team 1:_____ Team 2:_____

Team 1 Team 2

21. This structure, found in the stamen of a flower, is responsible for producing and releasing pollen grains, which contain male gametes for fertilization. Typically located at the tip of the filament, it plays a key role in plant reproduction. What is this structure called?

Answer: Anther

22. **Math Computation:** Angle theta is in quadrant three and the sine of angle theta equals $-\frac{3}{5}$. Find the cosine of angle theta.

Answer: $-\frac{4}{5}$

23. This South Korean president, elected in 2022, declared martial law in 2024, citing clashes with the National Assembly over governance issues. His actions prompted widespread backlash and a unanimous parliamentary vote to revoke the order. Who is this leader, the 13th president of South Korea?

Answer: Yoon Suk Yeol

24. **Math Computation:** A card is drawn at random from a standard 52-card deck. What is the reduced probability that it will be a face card?

Answer: $\frac{3}{13}$

25. This artistic and design movement emphasizes simplicity, using basic shapes, monochromatic color schemes, and clean lines to focus on form and function. It emerged in the mid-20th century as a reaction against excess in art and culture. What is this movement called?

Answer: Minimalism

26. This Byzantine emperor sought help from the West to confront the growing Turkish threat and became a vassal to the Ottoman Empire. His efforts marked the decline of Byzantine independence, culminating in the fall of Constantinople. He ruled from 1341 to 1376. Who is this emperor?

Answer: John V Palaiologos

27. This 1939 book examines the struggles faced by exiled European intellectuals during their fight against fascism. Written by siblings Erika and Klaus Mann, it profiles figures such as Bertolt Brecht and Thomas Mann, highlighting their contributions and resistance to Nazi ideology. What is this work called?

Answer: *Escape to Life*

28. **Science computation:** What is the magnitude of a force acting on an object to maintain equilibrium if one force pushes north at 39 newtons and another force pushes west at 52 newtons? Express your answer in newtons.

Answer: 65

29. This novel follows a dog who is stolen from his home and sold into the life of an Alaskan sled dog. As he struggles in the wilderness, he reconnects with his primal instincts, eventually becoming the leader of a wild pack. What is the title of this 1903 novel by Jack London?

Answer: *The Call of the Wild*

30. In genetics, this term refers to the observable characteristics or traits of an organism, resulting from the interaction between its genetic makeup and environmental influences. Examples include color, seed shape, and plant height. What is this term that describes the physical expression of an organism's genes?

Answer: Phenotype

Team 1:_____ Team 2:_____

31. In this whimsical 1970 children's book, a young boy named Mickey dives into a milk bottle, flies in a dough plane, and helps three bakers prepare the morning's cake. Written by Maurice Sendak, what is this surreal tale of a nighttime adventure called?

Answer: *In the Night Kitchen*

32. **Math Computation:** Find the limit as x approaches zero of the function: $f(x) = (x^4 + 3x^2 - 9) / (2x^3 + 5x^2 - 12)$ **[Read: f of x equals the quantity x to the fourth, plus three x squared, minus nine, end quantity, over the quantity two x cubed, plus five x squared, minus 12 end quantity].**

Answer: 3 / 4

33. This 19th-century Swiss humanitarian witnessed the suffering of wounded soldiers at the Battle of Solferino in 1859, inspiring him to advocate for neutral medical aid during wartime. He later co-founded the International Red Cross and won the first Nobel Peace Prize. Who was he?

Answer: Henry Dunant

34. This 19th-century short story follows a Puritan man who ventures into a dark forest, leaving behind his wife, Faith. There, he witnesses a mysterious gathering involving townspeople and a devil figure, blurring the line between reality and illusion. What is this work by Nathaniel Hawthorne?

Answer: *Young Goodman Brown*

35. This oceanic layer receives sufficient sunlight to support photosynthesis, making it home to most marine life, including phytoplankton and various fish species, as well as playing a critical role in Earth's carbon cycle. Typically extending from the surface to about 200 meters deep, what is this sunlit ocean layer called? _____

Answer: Photic zone

36. This director started off by making low budget horror films in his home country of New Zealand, before becoming one of the most successful blockbuster directors of the 2000s. Who is this director of *Bad Taste*, *The Frighteners*, *King Kong*, and most famously, *The Lord of the Rings* trilogy? _____

Answer: Peter Jackson

37. This medieval art style flourished in the Meuse River valley during the 11th and 12th centuries, blending Romanesque and early Gothic influences. It is best known for its intricate metalwork, illuminated manuscripts, and architectural sculpture. What is the name of this regional style, associated with the cities of Liège and Aachen? _____

Answer: Mosan Art

38. This World War I campaign aimed to secure a sea route to Russia and capture Constantinople. It ended in heavy Allied losses, particularly for Australian and New Zealand forces, and contributed to Winston Churchill's demotion from First Lord of the Admiralty and eventual resignation. What is this 1915 campaign called? _____

Answer: Gallipoli Campaign

Team 1:_____ Team 2:_____

39. This term refers to the processes involving the transfer of heat through a material without the movement of the material itself. It occurs by particles transferring their kinetic energy to one another through collisions. What is this method of energy transfer called?

Answer: Conduction

40. This organization was central to the implementation of the humanitarian ideas proposed by Henry Dunant. Formed in Geneva, it played a key role in the development of the First Geneva Convention. What is this organization known for providing medical care and aid during conflicts and natural disasters?

Answer: The Red Cross

Team 1:_____ Team 2:_____

Calculus One – Derivatives

Directions: Given an expression, find the first derivative with respect to x.

- | | | |
|-----|---|------------------------------|
| 1. | $5x$ [Read: Five x] | 5 |
| 2. | $x^2 + 3x + 2$ [Read: x squared plus three x plus two] | $2x + 3$ |
| 3. | $3x^4 - 5x^2 + 6$ [Read: Three x to the fourth minus five x squared plus six] | $12x^3 - 10x$ |
| 4. | $\sin(x)$ [Read: Sine of x] | $\cos(x)$ |
| 5. | $\cos(x)$ [Read: Cosine of x] | $-\sin(x)$ |
| 6. | $\ln(x)$ [Read: Natural log of x] | $1 / x$ |
| 7. | e^x [Read: e to the x] | e^x |
| 8. | $1/x$ [Read: One over x] | $-1 / x^2$ |
| 9. | $x / (x + 1)$ [Read: x over quantity x plus one] | $1 / (x + 1)^2$ |
| 10. | $x^3 \sin(x)$ [Read: x cubed times sine of x] | $3x^2 \sin(x) + x^3 \cos(x)$ |

Extras:

- | | | |
|-----|-------------------------------------|-------------------|
| 11. | $\tan(x)$ [Read: Tangent of x] | $\sec^2(x)$ |
| 12. | $\sqrt{x}$ [Read: Square root of x] | $1 / (2\sqrt{x})$ |

Team 1:_____ Team 2:_____

Chemistry Terms

Directions: Given the first letter of a term followed by a definition. Give the term.

- | | | |
|-----|---|-------------|
| 1. | P; an acid with more than one ionizable hydrogen atom | Polyprotic |
| 2. | A; a solution with water as the solvent | Aqueous |
| 3. | L; f block elements whose highest energy electron is in the 4f sublevel | Lanthanides |
| 4. | I; an atom or molecule with an unequal number of protons and electrons | Ion |
| 5. | B; the force holding atoms together in a compound | Bond |
| 6. | M; anything which exhibits the property of inertia | Matter |
| 7. | T; a compound formed from three elements | Ternary |
| 8. | C; a positive ion | Cation |
| 9. | H; reaction with water to form a weak acid or base | Hydrolysis |
| 10. | O; the loss of electrons | Oxidation |

Extras:

- | | | |
|-----|--|----------|
| 11. | M; two liquids which are mutually soluble in all proportions | Miscible |
| 12. | E; the passage of gas molecules through small openings | Effusion |

Team 1:_____ Team 2:_____

Literature - Authors and their Works

Directions: Given the name of a famous literary work, name the author.

- | | | |
|-----|-------------------------------------|------------------|
| 1. | <i>The Life of Samuel Johnson</i> | James Boswell |
| 2. | <i>Sister Carrie</i> | Theodore Dreiser |
| 3. | <i>Sanctuary</i> | William Faulkner |
| 4. | <i>A Child's Christmas in Wales</i> | Dylan Thomas |
| 5. | <i>The War of the Worlds</i> | H.G. Wells |
| 6. | <i>Shakespeare in Harlem</i> | Langston Hughes |
| 7. | <i>Smoke and Steel</i> | Carl Sandburg |
| 8. | <i>Finnegans Wake</i> | James Joyce |
| 9. | <i>Daisy Miller</i> | Henry James |
| 10. | <i>The Return of the Native</i> | Thomas Hardy |

Extras:

- | | | |
|-----|---------------------------------|-----------------|
| 11. | <i>And Then There Were None</i> | Agatha Christie |
| 12. | <i>The White Man's Burden</i> | Rudyard Kipling |

Team 1:_____ Team 2:_____

Extra Questions

Team 1 Team 2

E1. **Math Computation:** Solve for x in the equation $7(2x-3) = 4x + 9$. **[Read: seven times the quantity, two x minus three, end quantity, is equal to four x plus nine]**

Answer: $x = 3$

E2. This plant tissue layer regulates the movement of water and nutrients into the vascular system. Located between the cortex and the stele, it contains the Casparian strip, a waxy barrier ensuring selective transport. What is this innermost layer of the root cortex called?

Answer: Endodermis

E3. This widely used citation style is commonly required for papers in the humanities, especially in literature and English classes. What is this citation style that prescribes a format for citing sources and structuring the paper?

Answer: MLA Style (Modern Language Association)

E4. A revolutionary figure in the world of modern art, this artist challenged traditional notions of art with his ready-mades and conceptual pieces. He was a pivotal member of the Dada movement and later influenced the development of Surrealism. Which artist is best known for the piece "Fountain"?

Answer: Marcel Duchamp

Team 1:_____ Team 2:_____

E5. This comedic play, first performed in 1981, is set in a small Ukrainian village under a curse of chronic stupidity. The story follows a young school teacher, Leon Tolchinsky, who must educate the villagers to break the curse within 24 hours. What is this play by Neil Simon?

Answer: *Fools*

E6. Known as the “Florence on the Elbe” for its cultural and architectural significance, this German city was firebombed by Allied forces from February 13 to 15, 1945. The attack destroyed its historic center and caused tens of thousands of civilian deaths. What is this German city, home to the Frauenkirche?

Answer: Dresden

E7. This golfer, often considered one of the greatest in the sport's history, won 18 major championships, a record that still stands today. He is known for his rivalry with Arnold Palmer and his calm demeanor on the course. Who is this player, nicknamed the "Golden Bear"?

Answer: Jack Nicklaus

E8. This treaty was named after its authors and signed by fifteen nations including the United States, France, and Germany. What was this international pact in 1928, also known as the Pact of Paris, in which signatories promised not to use war as a tool of national policy?

Answer: Kellogg-Briand Pact

Team 1:_____ Team 2:_____

E9. **Math Computation:** What is the limit as x approaches infinity of the function: $f(x) = (5x^2 + 7x + 20) / (4x^2 - 2x + 15)$

[Read: f of x equals the quantity five x squared plus seven x plus twenty, end quantity, over the quantity, four x squared minus two x plus 15, end quantity].

Answer: 5 / 4

E10. This radioactive noble gas is colorless, odorless, and tasteless, naturally occurring as a decay product of uranium and thorium in soil and rocks. Due to potential health risks, particularly lung cancer, testing is often done to check for accumulation in buildings. What is this element, with atomic number 86?

Answer: Radon
